2008-2009 Review - Communications

SPE CAD NEWS – Now Electronic

CHAIRMAN’S MESSAGE

Spring marks the time when our thoughts turn to fresh starts, change and growth. SPE CAD has “spring fever” as we introduce some exciting format changes for communication. This issue of CAD NEWS represents our first electronically distributed newsletter. Besides saving a few trees and reducing our carbon footprint, the new format allows us to publish a much more interactive newsletter with links to sponsor’s websites and to event information.

Another first will take place in May, when the SPRING CAD Board of Directors meeting will be held using a web-based platform. This format will reduce travel expenses for the board members while allowing full participation. Growth continues in our group on the professional networking website LinkedIn.com. The “SPE Color & Appearance Division” LinkedIn group was started in September 2008 and continues to add members every week. We are also using this format as an additional communication tool for publishing SPE CAD events and activities.

Transition occurs with the close of ANTITEC™ 2009 in June. It marks the transition of our newly elected board members into active service. ANTITEC™ also marks the end of my term as SPE CAD Chairman and the induction of Howard Kennedy as the next CAD Chairman. Please join me in welcoming Howard. Howard has already made his mark on the board by serving on many committees and by leading our Strategic Planning committee. We look forward to Howard’s visionary thinking and his special brand of Canadian humor as he takes over in June.

Speaking of June, this year’s ANTITEC™ is special because it is being held concurrently with NPE in Chicago. It’s not often we get a “two for one” special, so this year is a great opportunity to attend two conferences in the same location. I recall the first SPE ANTITEC™ conference I ever attended. It was 1988 in Atlanta and the theme was “Plastics Are Shaping Tomorrow Today.” (That’s me in 1988 with Ethel Strudel at the ANTITEC™ (Plastics Reception).) Needless to say, ANTITEC™ left quite an impression on me and started my interest in SPE participation. I never dreamed of eventually being on the CAD Board and serving the membership as Chairman one day. It has been a privilege and honor to serve this capacity, and I am grateful for the opportunity to give back to an organization that has been the foundation of my professional network. I hope to see you at ANTITEC™ and at CAD RETEC™ 2009 (October 18-20, Indianapolis) Please say “Hi” if you see me there.

Have a Colorful Day,

[Signature]

SPE Chairman
