

Paul Martin's 2025 Bio

Process Engineering School: Compounding

Paul's roles and involvement at his current and previous companies have been in R&D, new process development, & executive management. His current and past successes have led to many novel process applications and sales within the extrusion equipment industry.

Paul has spent most of his career around rotating capital equipment and solving process issues with state-of-the-art equipment that are considered to be cutting edge extrusion applications. Over the past 20+ years, Paul has experience with market leading extrusion equipment companies like Krauss Maffei, Coperion, JSW, Berstorff & LIST USA. This experience has given Paul the polymer "know-how" from reactors to compounding polymer products.

Paul enjoys giving back to the Industry that has given him so much.

Paul is currently on the Society of Plastics Engineers Extrusion Division Board and has served time on the SPE Executive Board. Paul is very active within the Plastics community.

Paul enjoys sports of all kinds; running, jogging, golfing, boating, jet skiing, and almost any outdoor activity.
